

DATAVIV TECHNOLOGIES

Applied AI Lab — Course Handbook & FAQ

Introduction

Dataviv's Applied AI Lab courses are crafted for students, professionals, and capable individuals from every field, centered on applied AI to ignite innovation and foster job creation. Training is delivered in both virtual and physical settings, using our laboratory setup and equipment to impart the skills needed to succeed. Guided by seasoned mentors, learners progress through hands-on projects and real-world experiences. The curriculum spans fundamental concepts to advanced applications, ensuring a well-rounded, industry-relevant learning experience.

Courses List

Unless otherwise stated, each course runs 36 Hours (6 hours per week – 2 hrs x 3) with weekly micro-assessments and a final assessment.

A. Applied AI Lab — Computer Vision Core

No.	Course & Description	Level	Duration	Prerequisites
1	Metacognition — Rewiring the Brain for AI Understanding how humans perceive the world; building mental guardrails and reinforcing metacognition (B R A A I N).	Basic – Mandatory – Intro	36 Hrs	Mobile phone + AICTE-approved app (built in course); no coding
2	Data Management and Preparation Efficient data preparation to achieve planned AI outcomes; the full data lifecycle.	Basic – Choice – Spec.	36 Hrs	Intro to Computer Vision or any intro course
3	Deep Dive into Algorithms & Training for Computer Vision Nature, diversity and working of algorithms used to train intelligences through a CV lens.	Intermediate – Choice	36 Hrs	Intro to Computer Vision or any intro course
4	Quality Assurance and Assessment Assuring quality, accuracy and model resilience in AI solutions; guaranteeing performance.	Basic – Choice – Spec.	36 Hrs	Intro to Computer Vision or any intro course
5	Computer Vision Use Cases & End-to-End Lifecycle Management Hands-on CV development — 5 solutions in 5 weeks, 6th week long-term project.	Intermediate – Choice	36 Hrs	Intro to Computer Vision
6	Startup, Project, Innovation Custom industry problems, your own startup/innovation, or research developed as a startup.	Intermediate – Mandatory	36 Hrs	None; no coding

B. Business AI Courses

No.	Course & Description	Level	Duration	Prerequisites
7	Analyzing Business Data with AI AI-driven analytics for decision-making — predictive modelling, ML, data visualization.	Basic	36 Hrs	Basic business analytics; no coding
8	AI in Marketing & Customer Relationship Management (CRM) Personalize marketing, predict customer behavior, automate service for growth.	Basic	36 Hrs	Basic marketing/CRM; no coding
9	Computer Vision for Business Applications	Basic	36 Hrs	Basic business analytics; no coding

No.	Course & Description	Level	Duration	Prerequisites
	Apply CV to decision-making, efficiency, quality control and customer insights.			
10	Interaction AI for Business Innovation Engage customers via conversational agents, chatbots and virtual assistants.	Intermediate	36 Hrs	Basic AI; no coding
11	AI Project Management for Computer Vision Applications Manage the AI project lifecycle — objectives, data, algorithms, timelines, stakeholders.	Intermediate	36 Hrs	Basic AI; no coding
12	Quality Assurance in AI for Computer Vision QA best practices — testing models, data quality, edge cases, overfitting, bias.	Intermediate	36 Hrs	Basic AI and CV; no coding
13	Ethical AI Design and Governance Ethics and governance — fairness, transparency, compliance, accountability.	Intermediate	36 Hrs	Basic AI
14	Valuing AI Products and Systems Assess value of AI products — ROI, impact, costs, business cases, prioritization.	Intermediate	36 Hrs	Basic AI and business
15	Data Management and Preparation Full data lifecycle — collection, preparation, integration, evaluation.	Intermediate	36 Hrs	Basic CV AI or Interaction AI course
16	Startup, Project, Innovation Custom industry challenges, AI projects, or transitioning research into startups.	Intermediate	36 Hrs	Prior 3 courses (one CV or Interaction AI)

C. AI for Semiconductor Design & Manufacturing

No.	Course & Description	Level	Duration	Prerequisites
17	Advanced AI in Semiconductor Fabrication Predictive maintenance, process optimization, defect detection, yield improvement.	Intermediate	36 Hrs	Basic semiconductor principles + some ML
18	AI in Semiconductor Supply Chain & Manufacturing Optimization Predict supply chain issues, improve scheduling, reduce costs.	Intermediate	36 Hrs	Basic supply chain and manufacturing
19	Introduction to AI in Chip Design AI in layout planning, circuit optimization, and predicting chip behavior.	Mandatory – Intro	36 Hrs	Basic electronics & semiconductors; no coding
20	Advanced AI in Semiconductor Fabrication Predictive maintenance, process optimization, defect detection, yield improvement.	Intermediate	36 Hrs	Basic semiconductor principles + some ML
21	Cutting-Edge AI Techniques for Next-Gen Semiconductor Devices Reinforcement learning and deep neural networks for performance and energy efficiency.	Advanced	36 Hrs	Strong semiconductor + deep learning base
22	AI for Semiconductor Device Characterization & Performance Tuning Characterize devices; optimize speed, power, reliability for mobile, automotive, IoT.	Intermediate	36 Hrs	Device physics + basic ML
23	AI in Semiconductor Supply Chain & Manufacturing Optimization	Intermediate	36 Hrs	Basic supply chain and manufacturing

No.	Course & Description	Level	Duration	Prerequisites
	Predict supply chain issues, improve scheduling, reduce costs.			
24	Cutting-Edge AI Techniques for Next-Gen Semiconductor Devices AI for reliability testing, failure analysis, and lifetime prediction.	Advanced	36 Hrs	Advanced devices + failure mechanisms

D. AI Courses for Various Industries

No.	Course & Description	Level	Duration	Prerequisites
25	Artificial Intelligence for Managers Managing AI from a manager/operator's perspective; when, where and how to apply AI.	Intermediate	72 Hrs	None; no coding
26	Artificial Intelligence for Creative Business Professionals AI innovations to improve quality and time-to-outcome for creative professionals.	Intermediate	72 Hrs	None; AI built in the field
27	AI for Fashion and Apparel Design Trend forecasting, automated design, inventory management, sustainable fashion.	Intermediate	36 Hrs	Basic fashion design, textiles, data analysis
28	AI for Construction and Infrastructure Design, project management, predictive maintenance, sustainability.	Intermediate	72 Hrs	Basic construction, PM, data analysis
29	AI for Human Resources & Workforce Analytics Talent acquisition, workforce management, engagement, performance analysis.	Intermediate	36 Hrs	Basic HR principles
30	AI Solutions for Healthcare Professionals AI for diagnostics, treatment plans and patient care.	Intermediate	36 Hrs	Medical background + basic data/analytics
31	AI Solutions for Environmental & Sustainability Experts Renewable energy, pollution monitoring, resource management.	Intermediate	36 Hrs	Environmental science / sustainability background
32	AI Solutions for the Automobile Industry Autonomous vehicles, predictive maintenance, manufacturing optimization.	Intermediate	36 Hrs	Engineering / automotive background
33	AI Solutions for the Retail Industry Customer experience optimization, inventory management, sales forecasting.	Intermediate	36 Hrs	Retail management / e-commerce background
34	AI Solutions for Space Exploration Satellite data analysis and autonomous spacecraft navigation.	Intermediate	36 Hrs	Aerospace / space science background
35	AI in Nursing and Healthcare Support AI for nursing practices, patient care and support systems.	Intermediate	36 Hrs	Nursing / healthcare support background
36	AI Solutions for Aerospace Engineering Autonomous flight systems, spacecraft design, performance optimization.	Intermediate	36 Hrs	Aerospace / aviation background
37	AI Solutions for Architecture & Urban Planning Architectural design, building management, urban planning, smart cities.	Intermediate	36 Hrs	Architecture / urban planning / construction

No.	Course & Description	Level	Duration	Prerequisites
38	AI Solutions for Agriculture & Farm Management Crop management, precision farming, pest control, sustainable practices.	Intermediate	36 Hrs	Agriculture / ag engineering / farm mgmt.
39	AI Solutions for Mental Health & Psychological Support Virtual therapy assistants and predictive analytics for mental health.	Intermediate	36 Hrs	Psychology / counselling / mental health
40	AI in Dental Healthcare AI for dental diagnostics, treatment planning and patient care.	Intermediate	36 Hrs	Dentistry / dental healthcare background

E. Learn AI — Comprehensive Learning (Engineering)

No.	Course & Description	Level	Duration	Prerequisites
41	AI-Driven Innovation in Mechanical Engineering Design, manufacturing, predictive maintenance and optimization of mechanical systems.	Intermediate	36 Hrs	Mechanical engineering background
42	The Future of Electrical Engineering with AI From circuit design to energy distribution.	Intermediate	36 Hrs	Electrical engineering background
43	AI for Chemical Engineering: The Next Frontier Process optimization, sustainability and safety for petrochemicals & pharma.	Intermediate	36 Hrs	Chemical engineering background

F. AI for Technology Skill Sets and Roles

No.	Course & Description	Level	Duration	Prerequisites
44	AI Backend with Fast API: Enhancing Developer Efficiency Automate routine tasks, API efficiency, scalability and secure deployments.	Intermediate	36 Hrs	Backend development with Python
45	AI Product Manager: Leading AI Product Development Integrate AI into product development — decisions, prioritization, optimization.	Intermediate	36 Hrs	PM experience + AI fundamentals
46	AI in IoT: Building Intelligent Systems Smarter, more autonomous and responsive IoT devices.	Intermediate	36 Hrs	Basic IoT and AI fundamentals
47	AI UI Designer: Empowering Creative Professionals Automate design, improve UX, personalized outputs.	Intermediate	36 Hrs	Basic design tools (Adobe, Sketch, Figma)
48	AI Tester: Revolutionizing Software Testing with AI Automate testing, improve accuracy, identify bugs.	Intermediate	36 Hrs	Basic software testing methodologies
49	AI Front-End React: Building Smart User Interfaces Enhance UIs, performance and personalized experiences with AI.	Intermediate	36 Hrs	React.js and JavaScript
50	AI Blockchain: Revolutionizing Decentralized Systems Optimize blockchain efficiency, security and smarter Dapps.	Intermediate	36 Hrs	Blockchain and AI fundamentals
51	AI Robotics: Automating the Future of Work	Intermediate	36 Hrs	Basic robotics and programming

No.	Course & Description	Level	Duration	Prerequisites
	AI-powered robots for productivity, safety and automation.			

G. AI for Various Roles

No.	Course & Description	Level	Duration	Prerequisites
52	AI Fire Safety: Revolutionizing Emergency Response AI for fire detection, prevention and response.	Intermediate	36 Hrs	Basic fire safety principles
53	AI Traffic Management: Optimizing Urban Mobility AI to reduce congestion and improve urban mobility.	Intermediate	36 Hrs	Basic traffic & transportation planning
54	AI Cyber Security: Defending Digital Assets with AI Automate threat detection, identify vulnerabilities, incident response.	Intermediate	36 Hrs	Basic cyber security principles
55	AI Teachers: Transforming Education with Technology Personalized learning, classroom management, teaching and grading.	Intermediate	36 Hrs	Basic teaching practices
56	AI Business Owners: Optimizing Business Operations Automation, customer insights and predictive analytics.	Intermediate	36 Hrs	Basic business operations & management
57	AI Government Officials: Improving Governance with AI AI for public policy, city management and citizen engagement.	Intermediate	36 Hrs	Basic government functions & public policy
58	AI Forest Preservation: AI for Environmental Protection Monitor ecosystems, prevent deforestation, protect biodiversity.	Intermediate	36 Hrs	Basic environmental science & conservation

H. Interaction AI — Fundamentals for Innovation, Learning & Skill

No.	Course & Description	Level	Duration	Prerequisites
59	Interaction AI Fundamentals How AI interacts with humans and the environment; NLP, speech, gesture.	Basic – Mandatory – Intro	36 Hrs	None; no coding
60	Data Management and Preparation for Interaction AI Data's impact on interaction AI; effective collection and preparation.	Basic – Choice – Spec.	36 Hrs	Intro to Interaction AI or any intro course
61	Deep Dive into Algorithms & Training for Interaction AI Algorithms used to train intelligence through an interaction AI lens.	Intermediate – Choice	36 Hrs	Intro to Interaction AI or any intro course
62	Quality Assurance and Assessment for Interaction AI Assuring quality, accuracy and model resilience for interaction AI.	Basic – Choice – Spec.	36 Hrs	Intro to Interaction AI or any intro course
63	Interaction AI Use Cases & End-to-End Lifecycle Management Hands-on — 5 solutions in 5 weeks, 6th week long-term project.	Intermediate – Choice	36 Hrs	Interaction AI Fundamentals

No.	Course & Description	Level	Duration	Prerequisites
64	Perfecting Human Interaction Recognition Recognition of human interactions, gestures and expressions.	Intermediate – Choice	36 Hrs	Intro to Interaction AI or any intro course
65	AI Agents and Their Roles AI agents, classifications and industry impact, focused on Interaction AI.	Basic – Choice – Spec.	36 Hrs	Intro to AI or any foundational AI course
66	Large Language Models (LLMs) & AI in Language Processing Power, applications and development of LLMs for text and conversation.	Intermediate – Choice	36 Hrs	Intro to AI or any foundational AI course

I. Metaverse AI Core Curriculum

No.	Course & Description	Level	Duration	Prerequisites
67	An Introduction to Metaverse Overview of the Metaverse and related skill areas.	Basic – Choice – Spec.	45 Hrs	None; no coding
68	Generative AI for Metaverse Asset Building Building and identifying asset applicability for metaverse experiences.	Intermediate	45 Hrs	One AI Intro + Intro to Metaverse
69	Multi-Agent Interaction Design — Metaverse Multiple users and agents in one environment with custom experiences.	Intermediate	45 Hrs	None; no coding

J. AI for Geography and Linguistics

No.	Course & Description	Level	Duration	Prerequisites
70	AI in Geography Geographical analysis, environmental monitoring, spatial data; GIS, geopolitics.	Intermediate – Choice	36 Hrs	Intro to AI or any foundational AI course
71	AI for Linguistics Language processing, translation, phonetics; NLP, speech, preservation.	Intermediate – Choice	36 Hrs	Intro to AI or any foundational AI course

K. AI Curriculum — Beginner / School Levels

No.	Course & Description	Level	Duration	Prerequisites
72	Introduction to AI and Thinking Systems (Grade 4–5) AI concepts through interactive activities.	Beginner	36 Hrs	None
73	AI and Its Decision-Making Process (Grade 6–7) Deepening AI decision-making through interactive exploration.	Beginner	36 Hrs	Grade 4 AI course
74	AI in Real-World Interactions (Grade 8–9) How AI interacts with humans and surroundings.	Intermediate	36 Hrs (1hr x 2)	Grade 5 AI course
75	AI for Real-World Problem Solving (Grade 11) AI applications in practical challenges across industries.	Intermediate	36 Hrs (1hr x 2)	Grade 6 AI course

L. AI Curriculum and Classes for Seniors

No.	Course & Description	Level	Duration	Prerequisites
76	AI for Automation and Robotics AI's role in automating processes and robotics development.	Intermediate	36 Hrs	Grade 11 AI course

No.	Course & Description	Level	Duration	Prerequisites
77	AI for Human Interaction and Creativity Communication, creativity and social development.	Intermediate	36 Hrs	Grade 11 AI course
78	AI for Science and Research Scientific discovery, healthcare and space exploration.	Advanced	36 Hrs	Grade 11 AI course
79	AI for Business and Industry Business, finance and large-scale industries.	Advanced	36 Hrs	Grade 11 AI course
80	AI for Future Innovations Cutting-edge AI in futuristic and emerging technologies.	Advanced	36 Hrs	Grade 11 AI course

M. AI Courses with Hands-On (College Years)

No.	Course & Description	Level	Duration	Prerequisites
81	Foundations of AI and Applied Development Structured AI fundamentals and essential development skills.	Inter. to Advanced	72 Hrs (12 wks)	Grade 12 AI or equivalent
82	Advanced AI and Industry Applications Advanced AI techniques and real-world industry/research applications.	Advanced	72 Hrs (12 wks)	Year 1 AI coursework or equivalent
83	Advanced AI Systems and Specialization Specialized AI fields, research methodologies, large-scale applications.	Advanced	72 Hrs (12 wks)	Year 2 AI coursework or equivalent
84	AI Mastery, Research & Industrial AI Applications (Yr 4) AI mastery, industry-ready solutions and entrepreneurship.	Expert	72 Hrs (12 wks)	Year 3 AI coursework or equivalent
85	Mastering Large Language Models (LLMs) & AI-Powered NLP Advanced LLMs, real-world applications and research.	Expert	72 Hrs (12 wks)	Year 3 AI + NLP/deep learning
86	AI Agents, Autonomous Decision-Making & Multi-Agent Systems AI-powered agents for automation, autonomous reasoning, collaboration.	Expert	72 Hrs (12 wks)	Year 3 AI + RL/automation
87	AI Frameworks and Libraries for Scalable AI Development Top AI libraries, frameworks and best practices for scalable solutions.	Advanced	72 Hrs (12 wks)	Intermediate Python, DL basics
88	Advanced AI Development Techniques & Emerging Trends Research-driven, cutting-edge AI methodologies.	Expert	72 Hrs (12 wks)	AI Foundations + model dev experience

N. Advanced / Short AI Courses

No.	Course & Description	Level	Duration	Prerequisites
89	AI for Digital Marketing & Consumer Engagement AI in marketing, branding and audience engagement.	Beginner	18 Hrs (3 wks)	None
90	AI for Architecture & Urban Planning Architectural design, sustainable urban planning, construction efficiency.	Beginner	18 Hrs (3 wks)	None
91	AI in Accounting & Financial Management	Beginner	18 Hrs (3 wks)	None

No.	Course & Description	Level	Duration	Prerequisites
	Accounting accuracy, fraud detection, financial planning.			
92	AI for Finance & Investment Strategy Investment strategies, risk management, financial forecasting.	Beginner	18 Hrs (3 wks)	None
93	AI in Hospitality & Tourism Management Customer experience, travel optimization, business efficiency.	Beginner	18 Hrs (3 wks)	None
94	AI in Journalism & Media Content Creation Journalism, media ethics, content personalization.	Beginner	18 Hrs (3 wks)	None
95	AI in Psychology & Behavioral Analysis Psychological research, mental health, behavior analysis.	Beginner	18 Hrs (3 wks)	None
96	AI in Law & Legal Technology for Beginners Automating research, contract analysis and compliance.	Beginner	36 Hrs (6 wks)	None
97	AI in Music Production & Sound Design Music generation, sound mixing, creative collaboration.	Beginner	18 Hrs (3 wks)	None
98	AI for Climate Change and ESG Sustainability Bridging AI and sustainability for a greener future.	Intermediate	48 Hrs (8 wks)	Basic sustainability / ESG interest
99	Introduction to AI — A Basic Course A beginner-friendly journey into AI applications.	Beginner to Inter.	60 Hrs (10 wks)	None
100	AI Sales Mastery Selling AI solutions — technologies, customer needs, sales strategies.	Beginner	12 Hrs (2 wks)	None
101	AI for Consulting, Venture Capital & Private Equity AI for smarter investments, business strategies and deal flow.	Inter. to Advanced	48 Hrs (8 wks)	Basic business/finance/investment
102	Introduction to AI — A Basic Course A beginner-friendly journey into AI applications.	Beginner to Inter.	60 Hrs (10 wks)	None
103	Computer Vision Fundamentals How the computer sees the world — field, process and mechanism.	Basic – Mandatory – Intro	36 Hrs	None; no coding

Frequently Asked Questions

Question	Answer
Certificates	Issued from Dataviv Technologies USA, co-signed by the AI Leaders Board, USA.
Benefits of the Certificate	Supports higher-education enrolment, job raises, fund raises and job-finding, given Dataviv's global standing.
Course Types	Available for certification, diploma and degree credits with selected institutions. A second-degree option is offered via a project-based AI method. Details at the front desk.
Course Durations	Structured in hours and delivered in focused weekly sessions (most 36 hours; some 12–72 hours depending on the course).
Course Timings	Various time slots accommodate different schedules. Please check with the front desk.
Prerequisites	Most courses have no prerequisites unless explicitly mentioned with the course.
Batch Size	Typically, 60 or fewer, depending on available space.
Costs / Fees	Costs and availability can be inquired at the front desk. Full payment is required in advance to enroll.
How to Enroll	Enrolment is subject to passing an interview to maintain quality across our network and alumni. Request via the front desk or website.
Online Courses	Some courses may be available online. Please check with the front desk for virtual options.
Teaching Methodology	Experiential, hands-on learning with skills demonstrated through projects, delivered via our globally recognized Applied AI Lab.
Workload	Minimal; homework is not typically assigned. Our model prioritizes in-class, hands-on learning.
The Instructors	Hands-on industry professionals and AI experts with real-world experience, certified by Dataviv.
Hands-On Projects	Yes — every course includes hands-on projects for practical, real-world learning.
Industry Relevance	Courses align with AI industry transformations, keeping students relevant across AI fields.
Networking Opportunities	Yes — access to our extensive AI network, industry events, guest lectures and collaborations.
Financial Aid / Scholarships	Available for select students. Contact the front desk for eligibility criteria.
Access to Network (Alumni)	Dataviv alumni gain access to support, events and networking across our centers in India and globally.
Dataviv Business Cards	For the duration of your course, you receive a Dataviv Learner Business Card to showcase your affiliation.

FAQs Based on Actual Student Enquiries

Consolidated answers to the recurring questions received (fees, mode, schedule, registration, certificate).

Question	Answer
Is the course online or offline?	Offered in both virtual and physical (classroom) formats with hands-on lab work. Some courses may be fully online — confirm the mode of your course with the front desk.
What are the fees / cost?	Fees vary by course and duration. Costs can be inquired at the front desk; full payment is required in advance to enroll.

Question	Answer
When does it start / what is the schedule?	Start dates and timings vary by batch. Various time slots are available — check with the front desk for the current schedule.
How do I register / enroll? (Register Now not working)	Enrolment requires a short interview. Request via the front desk or website. If the online button is not working, contact the front desk directly (details below).
Will I get a certificate of completion?	Yes — certificates are issued from Dataviv Technologies USA, co-signed by the AI Leaders Board, USA, with global standing.
Are courses live or pre-recorded?	Our methodology emphasizes live, experiential, hands-on learning through the Applied AI Lab.
Is the course available on weekends?	Multiple time slots suit different schedules; weekend availability can be confirmed with the front desk.
Is there a corporate / group discount?	Corporate and group training (e.g. upskilling teams with industry use cases) can be arranged. Contact the front desk with team size and use cases for a tailored proposal.
Which semester / level can attend?	Most professional courses have no semester restriction. School (Grades 4–11) and college-year courses have stated prerequisites — see the course table.
Who are the faculty members?	Hands-on industry professionals and AI experts with real-world experience, certified by Dataviv.
